Invitation letter to IMCCE for Altair Ramos Gomes Júnior

To whom it may concern,

The “Institut de Mécanique Céleste et de Calcul des Ephémérides” (IMCCE, Paris observatory UMR CNRS 8028) is happy to invite Altair Ramos Gomes Júnior to stay at IMCCE, Paris during the period 1st September 2016 – 31 August 2017. He will benefit from the CAPES-COFECUB grant.

Altair Júnior will spend one year in our institute for his young career PhD work under supervision of Dr. Marcelo Assafin about the study of the dynamical effects on the Neptune-Triton system. He will work at IMCCE with Dr. Valéry LAINEY, join a research team at IMCCE and become full member of our institute. He will hence benefit of all facilities, infrastructure and equipment (office, computer access, library, etc.) from our institute and the Paris observatory organization, as well as the possibility to access to specific funding, and also to publish and present his results. Besides, Altair will be part of the exchange project we have with Observatorio Nacional and Valongo Observatorio in Rio de Janeiro.

Yours sincerely,

Pr. D. Hestroffer
Director of the IMCCE
